Joe Bader

Software Engineering Leadership, Platform Architecture, Full-Stack & AI Development
Philadelphia, PA 19129 | joseph.bader@gmail.com | joebader.com | linkedin.com/in/josephbader

SUMMARY

Software engineering leader with 20+ years building and modernizing customer-facing web platforms across enterprise, SaaS, consulting, and startup environments. Led and mentored five cross-functional teams on a core B2B SaaS product, spent four years on high-traffic Comcast platforms serving millions of customers, and founded an AI SaaS as sole architect. Hands-on across the full stack — TypeScript and React front ends, cloud-native services, and the CI/CD and testing systems around them — with a record of improving delivery predictability and scaling AI-assisted development.

TECHNICAL

Languages: TypeScript, JavaScript, SQL, Ruby, .NET, PHP, HTML, CSS
Frameworks: React, AngularJS, Node.js, Ruby on Rails, Bootstrap
Cloud & Infrastructure: AWS, Azure, Cloudflare, Heroku, DigitalOcean, Linux
CI/CD & Testing: GitHub Actions, Jenkins, CircleCI, Azure DevOps, Playwright
AI Engineering: LLM integration (tool calling, model evaluation), agentic development
Practices: Team leadership and mentoring, agile delivery, architecture stewardship, platform modernization, DevOps, DORA metrics

EXPERIENCE

Founder & Principal Engineer
07/2025 - Present

Tuner Logic (tunerlogic.com) | Remote

- Founded and launched Tuner Logic, an AI-assisted SaaS platform for automotive performance tuning; sole architect from concept through public launch, shipping ~1,000 commits across 350+ pull requests in the first year.
- Architected the full stack — React 18/TypeScript front end, Cloudflare Workers backend (Hono, Drizzle, D1, R2) — including a binary calibration editor with 2D/3D table views and revision diffs, plus a multi-channel telemetry analysis engine.
- Built an LLM assistant with function calling grounded in live application data, including server-side provider proxying (Anthropic, OpenAI), usage-metered credit billing via Stripe, and nightly automated model evaluations.
- Applied ISO 26262-inspired safety practices: per-component ASIL classifications driving ratcheting test-coverage gates toward 100% across unit, integration, and E2E suites.
- Built continuous delivery on GitHub Actions and Cloudflare with per-PR preview environments, sharded Playwright E2E, and recurring security audits.
- Engineered a multi-agent AI development platform — coding agents orchestrated across isolated git worktrees on self-hosted runners, with an AI code reviewer as a required merge gate — sustaining multi-team throughput solo.

Senior Manager, Software Engineering
12/2021 - 12/2025

Riskonnect | Remote

- Led and mentored five cross-functional engineering teams (5–8 engineers each) supporting a core B2B SaaS platform, improving on-time delivery from 30% to 95% while meeting reliability targets.
- Led a major UI modernization effort using agentic AI to migrate a legacy Bootstrap interface to the latest version, including inventorying, planning, and updating thousands of UI files.
- Served as senior architecture reviewer for high-impact initiatives, helping teams identify weak design approaches before implementation and reducing long-term platform risk.
- Scaled AI-assisted development practices across five teams, increasing pull request throughput by 40%.
- Partnered with product and engineering leadership to sequence multi-quarter initiatives and manage stakeholder communications, improving roadmap predictability.
- Implemented engineering metrics and review cadences that improved lead time for changes by 4x and increased visibility for planning and execution.

Lead Software Engineer (Contract) *10/2018 - 07/2021*
Comcast (via TEKsystems) | Philadelphia, PA

- Served as a lead engineer on four high-visibility initiatives across Comcast's digital sales and account management platforms.
- Served as a senior developer on Buy Online, Pick Up In-Store implementation across five applications and services, improving customer workflows and reducing reliance on slower fulfillment paths.
- Contributed to the re-architecture of high-traffic customer-facing systems serving millions of users, reducing critical page latency and production defect rates.
- Owned billing, consent, and call-center integration workflows tied to revenue and compliance, hardening audited workflows against compliance defects.

Founder, Managing Partner, and Technology Principal *10/2017 - 10/2018*
5 Foot Gorilla, LLC | Philadelphia, PA / Remote

- Built and led a technology consulting firm delivering custom SaaS, web, and mobile solutions from discovery through production launch.
- Owned solution architecture, technical execution, sales scoping, and delivery governance across client engagements, advising clients on modernization and scalable architecture strategy.

Principal Software Engineer / Development Manager (Contract) *02/2016 - 09/2017*
Comcast (via FIS Global / Yoh) | Philadelphia, PA

- Served as a lead engineer on the redesign and re-architecture of Xfinity My Account, a customer-facing platform serving approximately 11 million monthly users, leading tiger teams within the program; the redesign received the Creativity International Gold Award for Web Redesign.
- Owned billing and payment journeys, among the highest-traffic self-service flows in the application.
- Partnered with product, design, and service architecture leaders to deliver 26 major releases in 19 months while controlling scope churn through disciplined backlog and release management.
- Helped deliver the program ahead of schedule and under budget, streamlining billing journeys and improving bill-payment completion.

Chief Product Officer *05/2015 - 02/2016*
Cnverg | Philadelphia, PA

- Took a prototype-stage product to market in under six months by stabilizing the codebase and formalizing delivery practices.
- Led a mixed team of engineers, contractors, and interns, driving performance tuning and platform hardening that supported 560% user growth.

User Interface Architect / Tech Lead *11/2013 - 05/2015*
EY Design Studio (formerly Intuitive Company) | Philadelphia, PA

- Served as technical lead on multidisciplinary teams delivering custom enterprise solutions across three concurrent client engagements.
- Led UI architecture and technical planning in partnership with principals and engagement leads, improving delivery predictability and reducing rework.

Earlier Career *2003 – 2013*

- Delivered 25+ web and systems engineering projects as an independent contractor, with 90% repeat-client business and 95% on-time delivery.
- As a UI Developer at cPanel, contributed to a major interface overhaul used by millions of end users, improving task completion and time-to-complete by 80%.
